IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Este informe contiene información muy importante sobre su agua potable.
 Tradúzcalo o hable con alguien que lo entienda bien.

MONITORING REQUIREMENTS NOT MET FOR KINNELOA IRRIGATION DISTRICT

Our water system failed to monitor as required for drinking water standards during the past year and, therefore, was in violation of the regulations. Even though this failure was not an emergency, as our customers, you have a right to know what you should do, what happened, and what we did to correct this situation.

Our water system failed to monitor and report as required for drinking water standards during the past year and, therefore, was in violation of the regulations. Even though this failure was not an emergency, as our customers, you have a right to know what you should do, what happened, and what we did to correct this situation. We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During September 2023, we did not monitor for bacteriological quality from three of our groundwater sources, and therefore, cannot be sure of the quality of your drinking water during that time. Additionally, during September 2023, we did not monitor for bacteriological quality in the distribution system in accordance with our approved plan, and therefore, cannot be sure of the quality of your drinking water during that time. Additionally, during October 2023, we did not monitor in accordance with our approved plan for repeat bacteriological samples for total coliform and therefore, cannot be sure of the quality of our drinking water during that time. Furthermore, we are also required to report to the State Water Board by the end of the day on which our water system is notified of the test result(s) for when the coliform criteria indicating a possible significant rise in bacterial count are reached or exceeded. The reporting of these test result(s) on time is important when determining if there is a significant rise in bacterial count. We did not report to the State Water Board of the raw E. Coli positive test result by the end of October 18, 2023.

What should I do?

- There is nothing you need to do at this time.
- The table below lists the contaminant(s) we did not properly test for during the last year, how many samples we are required to take and how often, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required Sampling Frequency	Number of Samples Taken	When All Samples Should Have Been Taken	When Samples Were or Will be Taken
Raw Source Bacteriological Quality	1 per month	0	September 2023	October 2023
Distribution Total Coliform (routine)	First and third week of each month	11	September 2023	October 2023
Distribution Total Coliform (repeat)	Within 24 hours of a total coliform positive sample	1	October 5, 2023	

- If you have health issues concerning the consumption of this water, you may wish to consult your doctor.

What happened? What is being done?

Due to oversight by District staff, bacteriological quality monitoring was neglected in September 2023 for three raw groundwater tunnels and the distribution system, while repeat samples were not taken in October 2023 as per the approved plan. Additionally, a positive E.Coli result was not promptly reported to the SWRCB by the end of the day due to operator oversight. Subsequently, revisions were made to the monitoring and sampling plan, staff received training, and internal controls were implemented to mitigate future errors.

For more information, please contact Tom Majich, General Manager at 626-797-6295 or Kinneloa Irrigation District office at 1999 Kinclair Drive Pasadena, CA

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this public notice in a public place or distributing copies by hand or mail.

Secondary Notification Requirements

Upon receipt of notification from a person operating a public water system, the following notification must be given within 10 days [Health and Safety Code Section 116450(9)]:

- SCHOOLS: Must notify school employees, students, and parents (if the students are minors).
- RESIDENTIAL RENTAL PROPERTY OWNERS OR MANAGERS (including nursing homes and care facilities):
 Must notify tenants.
- BUSINESS PROPERTY OWNERS, MANAGERS, OR OPERATORS: Must notify employees of businesses located on the property.
